

## **Batcombe Parish Council**

27 June 2019

Questions for CDS / Gigaclear – for the Scrutiny Committee of Mendip Council at the request of Michael Gay

### **Background**

Gigaclear are significantly behind schedule in all five of its contracts with CDS. They are on notice of default pending a revised plan by the end of July. Some of the questions below may be answered by the revised plan.

The Parish of Batcombe is in “Lot 3 Eastern” under the area “Milton Clevedon”.

### **Questions**

1. When will Gigaclear be implemented for us?
2. How many implementations have Gigaclear done in Mendip (I believe this to be zero.)
3. Assuming that CDS continue with the Gigaclear contract, what processes are they putting in place to ensure that the contract is met this time?
4. If some house is an area go with an alternative commercial provider (eg Truespeed) will Gigaclear still come to the area?
5. What is the contingency plan if Gigaclear cannot deliver?
